Peninsula High's prestigious math and science programs are geared to meet the needs of students to be successful at all levels--from the basics to AP Scholars and beyond. PVPHS was named a 2011 US News & World Report Top 100 Math/Science high school. Science research and other special projects such as SMERT (Science-Math-Engineering-Robotics-Technology) give students the opportunity to apply the classroom to the real world with consistent state, national, and international accolades that have resulted in acceptances to premier colleges including Harvard, Yale, MIT, Princeton, USC, UCLA, Stanford, and more.

SMERT - Science-Math-Engineering-Robotics-Technology

This is where academic classes meet the real world. SMERT is designed to inspire students to pursue careers in engineering, science, technology, and design, providing real-world, hands-on experiences. Students are exposed to a variety of engineering fields, scientific principles, mathematic concepts and communication skills through individual and team projects using state-of-the-art computer labs and software. Students will learn how to demonstrate various principles through classroom interaction, laboratory experiments, and competitions at the state and national levels.
